

Hezner

Project Description:

This branch bank project for Waukegan Savings and Loan was designed to further establish the banks business position in Waukegan, and further represent their new business branding image. The building is 2,500 S.F. but feels much larger inside. The application of engineered glass helped establish a strong architectural form and superior transparency from inside. The bank wanted to project a modern and forward thinking image to go with their progressive approaches to banking. The bank and the City of Waukegen were pleased with the result. The Hezner Corporation was the architect for the project and Hezcorp Construction Services was the General Contractor.

Project:

**Waukegan Savings and Loan
